

NEW YORK STATE E

## MODULE DESCRIPTION

This module introduces students to the importance of safety in trade and technical careers. Students will examine the safety risks and hazards inherent in specific trade areas and learn about the ways workers can minimize risks and prevent hazards. Students will have opportunity to weigh their interest in specific trade and technical careers against their willingness to accept the typical risks of working in those careers. Students will explore the wide variety of trade and technical career options and identify the knowledge, skills, education, and training necessary for working safely in these fields.

## GUIDING QUESTION

What knowledge and skills are necessary to demonstrate appropriate and consistent use of policies, equipment, and techniques that foster workplace safety in trade and technical careers?
